

## FROM THE EDITOR-David Karr(CP Eng, FIEEA)

Welcome to the second issue of the IIEA newsletter for the 2021/22 year. We are continuing to have varied and interesting Industrial Engineering(IE) Articles.

With the various challenges that are confronting the world at this time, it is essential that we as IEs, are at the forefront of these encounters. Be it as project leaders in finding/implementing the solutions, or undertaking and facilitating the research in an efficient and effective manner. This hopefully will lead to beneficial outcomes for humankind.

Wishing you and your family a Safe and Prosperous Festive Season.
